Oshinibosi Abdulazeem
Data Scientist | Machine Learning Associate

Lagos, Nigeria | +234 811 632 2336
ayomideabdulazeem@gmail.com
Portfolio | GitHub

PROFESSIONAL SUMMARY

Data Scientist with experience in Python, R, and SQL. Experienced in building data-driven solutions through machine learning and statistical analysis. Skilled in predictive modeling, data visualization, and model optimization. Dedicated to delivering actionable insights and continuously advancing technical expertise.

SKILLS

Languages: Python, R, SQL
Machine Learning: Scikit-learn, Regression, Classification, Clustering, Model Evaluation
Data Analysis & Statistics : Pandas, NumPy, Statistical Modeling, Hypothesis Testing, Probability, Exploratory Data Analysis, Feature Engineering
Databases: MySQL, PostgreSQL
Concepts: Predictive Modeling, NLP, Deep Learning, Data Visualization
Tools: Git, Jupyter Notebook, Excel, Power BI

EXPERIENCE

KOH(CALL CENTER HUB) *Call Center Research Associate*
June 2026 - Present

- Collected and validated community data through structured research calls to support data quality and analysis
- Updated and maintained respondent records, ensuring accurate and organized datasets
- Categorized responses and documented insights to improve data usability for research activities
- Supported data collection workflows through record management and quality assurance processes

AFRIMENT *Data Analytics Intern*
September 2026 – October 2026

- Conduct structured market research across companies, training academies, platforms, foundations, and career communities to identify market gaps and business opportunities.
- Collected, organized, and documented 419 public records across six research categories, maintaining source references and supporting evidence for analysis.
- Analyzed job market demand and competitor training offerings to identify skill gaps, industry trends, and potential partnership opportunities.
- Collaborated with team members to analyze findings, develop data-driven recommendations, and present actionable insights to stakeholders.

NINJATRADER TEAM *Remote Sales Representative*
September 2026 - October 2026

- Executed approximately 150 daily outbound outreach activities across LinkedIn, Instagram, Telegram, X, Facebook, and other social platforms to identify potential customers.
- Researched and qualified prospects based on their interests in trading, cryptocurrency, and financial education.
- Managed prospect conversations using consultative selling and relationship-building techniques to understand customer needs and assess lead quality.
- Guided interested prospects toward sales calls and enrollment by communicating product value and addressing questions.
- Maintained prospect information and outreach records to support lead tracking, pipeline management, and performance monitoring.

DATACOMMUNITYAFRICA (DCA) *Data Science & Machine Learning Associate*
Jan 2026 – Present

- Planned and structured analytical workflows to support machine learning initiatives and decision systems
- Conducted exploratory analysis to assess dataset structure, quality, and feature relevance
- Designed and developed predictive models for classification and regression-based decision support
- Evaluated and validated model performance using statistical testing and performance metrics
- Improved model outcomes through feature engineering and iterative model optimization strategies
- Developed visualization systems to communicate insights for stakeholder and business reporting
- Managed end-to-end machine learning workflows from data preparation to model evaluation and optimization.

TECHCRUSH *Data Analyst / Junior Data Scientist*
Feb 2026 - July 2026

- Engineered data preprocessing workflows to improve dataset quality and analytical efficiency
- Conducted exploratory data analysis to identify patterns, trends, and anomalies
- Applied statistical techniques for outlier detection using Z-score, percentiles, and box plots
- Built SQL queries for data extraction, transformation, and analysis
- Developed predictive models using regression and classification techniques
- Applied supervised and unsupervised learning methods for pattern discovery
- Created data visualizations for reporting and insight communication

LASEPA *Laboratory Administrator*
June 2025 – May 2026

- Maintained laboratory records, documentation, and operational reports to support data accuracy
- Organized research-related information and assisted with reporting activities
- Managed inventory records and monitored laboratory materials usage

MINISTRY OF AGRICULTURE, ABEOKUTA *IT Support Intern*
July 2023 - Jan 2024

- Provided technical support and troubleshooting for hardware and software issues
- Assisted in network configuration and maintenance

EDUCATION

B.Sc. Plant Science
Olabisi Onabanjo University, Ogun State - 2020 - 2024
O-Level, Science
Adeola Odutola College, Ogun State 2014-2020

CERTIFICATIONS & ACHIEVEMENTS

- Afriment – September 2026

Conducted market research and data analysis to identify industry trends, skill gaps, competitive insights, and potential business opportunities supporting data-driven decisions.

- DataCamp – April 2026

Completed structured training in Python, R, statistics, and machine learning, covering data analysis, visualization, and predictive modeling techniques applied to real-world problems.

- TechCrush – July 2026

Recognized among the top 1% of participants for outstanding performance in data analysis, statistical modeling, and machine learning applications.
